1.-13. (Cancelled)

14. (Original) A structure comprising:

a substrate, said substrate comprising a first region and a second region;  
a multilayer mirror disposed over said first region and said second region;  
a phase-shifter layer disposed over said multilayer mirror in first region  
an intensity balancer layer disposed over said multilayer mirror in said  
second region; and  
a capping layer disposed over said phase-shifter layer in said first region  
and over said intensity balancer layer in said second region.

15. (Original) The structure of claim 14 wherein said phase-shifter layer comprises molybdenum.

16. (Original) The structure of claim 15 wherein said intensity balancer layer comprises silicon nitride.

17. (Original) The structure of claim 16 wherein said phase-shifter layer comprises about the same thickness as said intensity balancer layer.

18. (Original) The structure of claim 17 wherein said phase-shifter layer comprises a thickness of about 55 nm.

19. (Original) The structure of claim 18 wherein transmission in said first region is about the same as transmission in said second region.

20. (Original) The structure of claim 19 wherein phase in said first region is shifted about 180 degrees from phase in said second region.
